4.7 Self-assessment

1.Extension submodule(5/10)

- The unit test is included and it can be compiled successfully. However, more testing instances can be added into the unit test for through unit testing.
- It would be better to have some comments inside for other people to better understand the code if they are not the programmer of this extension submodule.
- The methods' names might be too long for convenience of coding.

2.Test(15/35)

- The unit tests and system tests are included and they can be compiled successfully. However, more testing instances can be added into the unit test for through unit testing.

3.Code(20/45)

- Methods' names in some classes might be too long for convenience of coding.
- Some methods might can be much more efficient.
- There could be some self-debugging methods inside the code.

4.Report(5/10)

- All courseworks are consistent with each other.
- The review and justification might be too subjective so that some mistakes still can not be found.
